We already saw in previous videos how in our Travel Agency application we could add a variable & Trips to our grid , and how to load it for each line from the Load event .

If instead of implementing this on a manually created web panel as we did, we wanted to use the Work With for Web pattern , how would we do that ?

attern Work With for Web			
	O Properties	∓ X	
WWAttractionsFromScratch X 🔄 Attraction X	}≣ ⊉l ₩ Filter	X

∨ ▼ Filter			
V 🐌 Attributes			

To add the variable , we right - click on the Attributes / Add / Variable node.

We define it through the properties window where we will be asked to name the variable and its domain . Also , we will see that a property named Load Code is displayed .

That's where we specify what value the variable will be loaded with for each line of the grid .

We will enter the Count formula , passing it the TripDate attribute , just as we did from the WebPanel generated by us , since we are interested in counting the number of trips entered for each of the attractions .

Pattern Work With for Web

If we save what we have done in the "instance file " of the pattern and open the web object WWAttraction panel created automatically, we will see that in the Load event of the grid, the pattern placed the code that we indicated to load the variable.

Let's see how it works .

Pattern Work With for Web

Now , we want to add a text / link / button outside the grid , which allows us to invoke the Attractions Report procedure that we had created to print all the attractions as a PDF.

We add an action at the level of the Selection node that implements the Work With itself.

And by means of the properties we indicate the Caption that it will have, as well as if we want it to be an image instead of a text, if we want it to be outside the grid, or, on the contrary, a button inside the grid, for each line.

And most importantly : what object to invoke as a consequence of choosing action .

Attr	actions	Q,	Name					+INSERT	ATTRAC	TIONS PDF	R	A	Attractio	n List	
	ы	Name	Country Name	Category Name	Photo	City Name	Description Trip:					3			
	4	Christ the Redemmer	Brazil	Monument	The second	Rio de Janeiro	An Art Deco statue of Jesus Christ in Rio de 2 Janeiro	U	PDATE	DELETE					
	12	Cinque Terre	Raly	Tourist site	*	Maranola	A string of centuries- old seaside villages on the rugged Italian Riviera coastline	U	PDATE	DELETE		Id	Name Christ the Redemmer	Country Brazil	Photo
	3	Eiffel Tower	France	Monument	1	Paris	Wrought-ron lattice tower on the Champ 2 de Mars in Paris.	U	PDATE	DELETE		1	Louvre Museum	France	-
	7	Forbidden city	China	Tourist site		Beijng	The former Chinese imperial palace and state residence of the 4 Emperor of China from the Ming dynasty	U	PDATE	DELETE		3	Eiffel Tower	France	
					1973		A railway viaduct on the West Highland Line in Glentinnan, Located at the top of Loch Shiel					2	Great Wall	China	
	8	Glenfinnan Vladuct	Scotland	Tourist site		Gienfinnan	in the West Highlands of Scotland, the 2 viaduct overlooks the Gientinnan Monument	U	PDATE	DELETE		6	Forbidden city	China	
												5	Smithsonian Institute	United State	<u>م</u> الم

We see it running.

Attraction X 🕐 Navigation View Web Layout 5 Rules 5 Event	s 🛛 💪 Conditions		_	_				_			~	1
